EXPERIENCE

11/2020 to Current

Tech Lead

Paytm — Noida, India

- Paytm had launched the all-in-one Android PoS device for merchants to accept payments from Paytm Wallet, cards, UPI, etc. The company is also in talks with multiple state government to enable its 'Scan to Order' QR code for customers to make contactless food ordering and payment at restaurants, and take away units. Restaurants could use the code as a white label product by using their own logo, and brand colour on the QR card even as they could also merge the code into their own brand pamphlets, hoardings, and signboards.
- Handle Lending project for providing loan for pan india customers
- Implemented Jenkins pipeline for continuous deployments.
- Alerts creation through yaml and grafana/Prometheus and monitoring.
- Provide required data to business team for analysis through Mysql.
- On board pan India customers in paytm and resolve their any kind of issues while onboarding.
- Handle ATS project to track every device through barcode.
- Available 24*7 work environment .
- Server Health checkup responsibility
